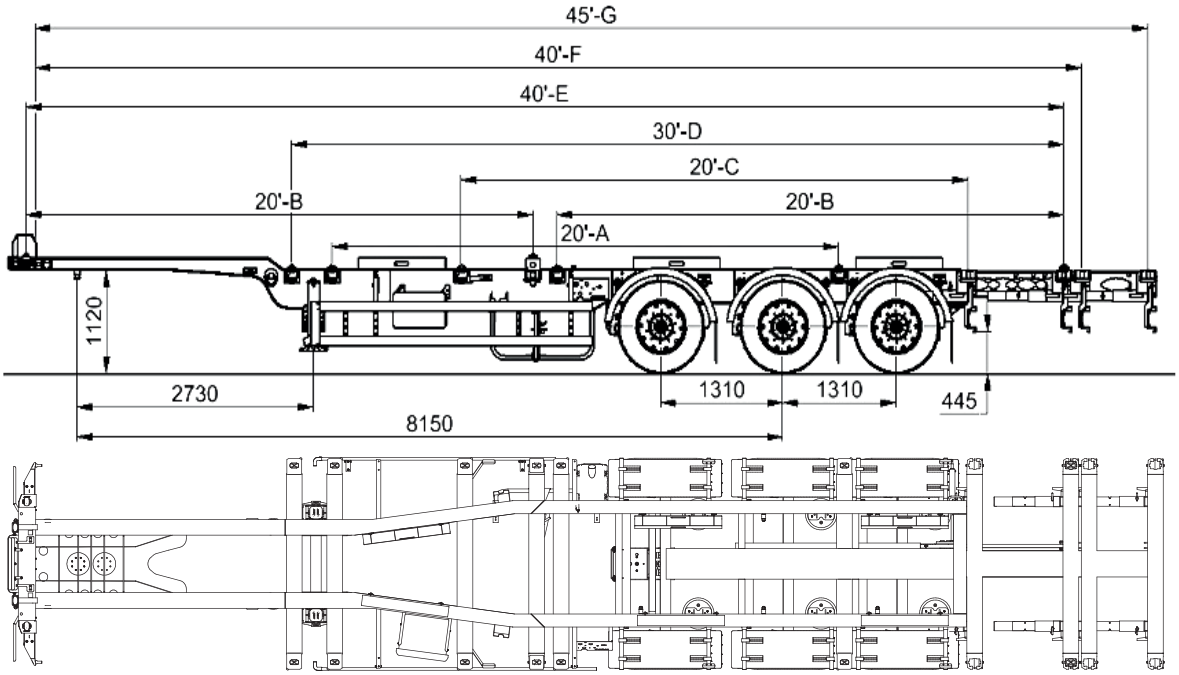
Extendable semitrailers for ISO containers transport

[1x20’, 2x20’, 1x30’, 1x40’, 1x40’HQ, 1x45’HQ]

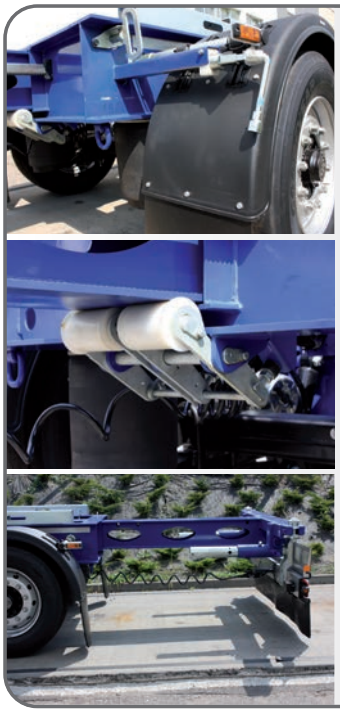


TECHNICAL PARAMETRES:

External length – maximum	**13 270 mm***
External length – minimum	**11 200 mm***
External width	**2 500 mm***
Own weight	**5 600 kg* ±4%**
GVW	**≤44 000 kg***
Fifth wheel height	**1 120 mm***

*Presented dimensions and weights have illustration character and may change depending on product specification, technologies, components used and the standards by which the product was made

Coupling plate with possibility of 2 positions of the kingpin – solution which enables "balancing" load distribution when transporting one heavy container eg. 20'



Mechanical system of semitrailer's extension – solution dedicated to transport of ISO containers:
***1 x 20'** - container loaded in the middle*
***1 x 20'** - container loaded in the rear*
***1 x 30'** - container loaded in the rear*
***2 x 20'** - extended semitrailer*
***1 x 40'** flat – extended semitrailer*
***1 x 40'** tunnel – extended semitrailer*
***1 x 45'** - extended semitrailer*
